

QObject

QVector< double >

myHist1D

```
classDiagram
    class QObject
    class QVector["QVector< double >"]
    class myHist1D
    QObject <|-- myHist1D
    QVector <|-- myHist1D
```

The diagram illustrates a class hierarchy where myHist1D inherits from both QObject and QVector<double>. A horizontal line connects the two parent classes, with a vertical line descending from its center to myHist1D. Arrows point from myHist1D up to each of the parent classes.
